

Air Freight

For time-sensitive cargo, you need SEAWAY's air freight expertise. Whether it's an urgent last-minute order, small sample shipments, or perishable cargo, SEAWAY's air freight team will have the solution for all your time-sensitive cargo.

We have the perfect locations which are at or close by to every major Australian Airport. As an IATA accredited agent, SEAWAY offers a full complement of services from bookings and allocation to shipment consolidation.

We have various cold treatment packaging options, Unit Load Device (ULD) loading and all correspondence/documentation responsibilities with both the airlines and Cargo Terminal Operator's (CTO's).

Maintaining cold chain best practice is imperative for all air freight shipments (import and export). Our proximity to CTO's allows us to extend the time under temperature control.
